

Updating the software of 7806-7807-7808-7846

You can easily update the software to get new functions. The update process requires an USB key.

Download the update file **FIRM_vX.X.BIN** on our website (www.sefram.fr):

http://www.sefram.com/www/NP_D_SOFTWARE.asp

Insert an USB key in your PC.

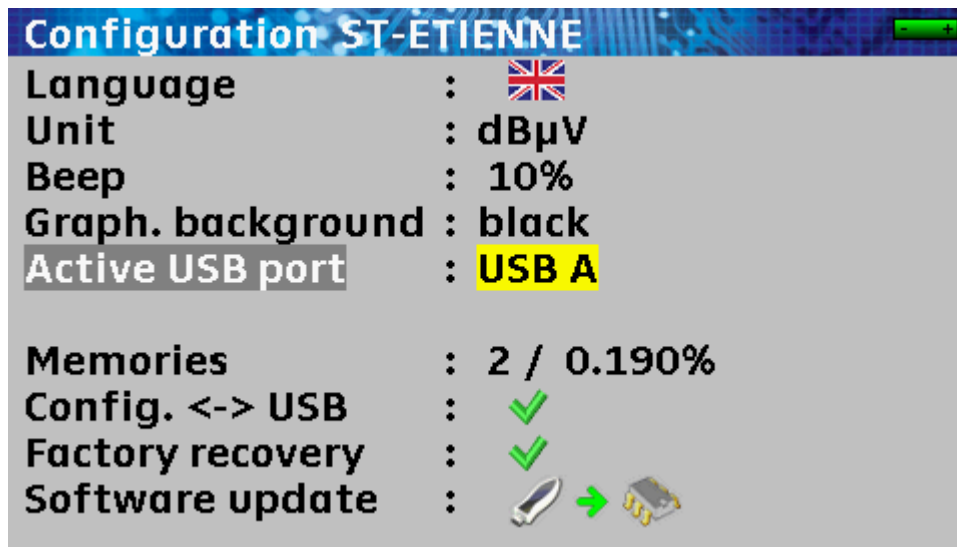

Copy this file on the home directory of the key.

Pull out the USB key.

Turn the appliance on: Check that the battery status is sufficient (> 30%). You'd better connect the appliance to the mains with the provided adapter.

Push the Toolbox key  to get the Configuration page.

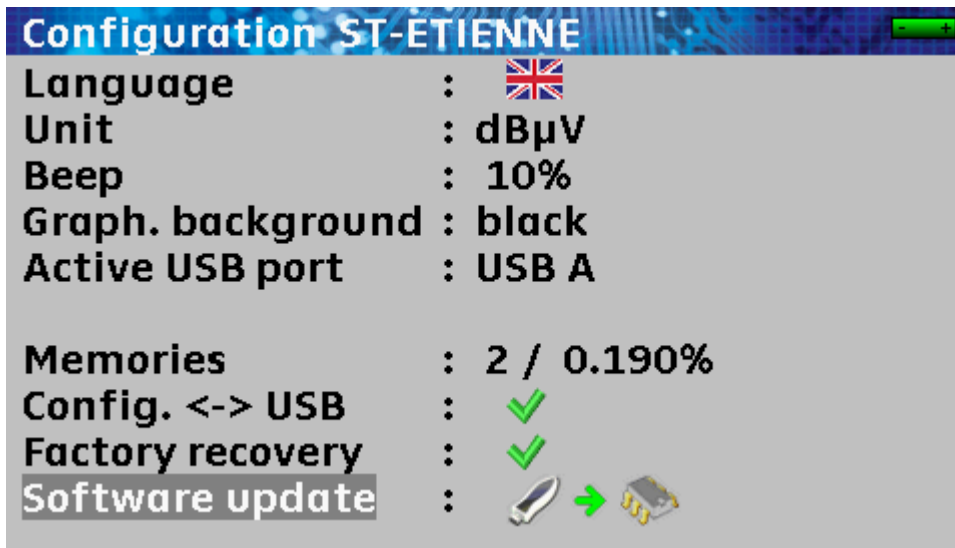

Check that the active USB port is the USB port A and that nothing is connected to the USB port mini B.

Insert the USB key into the connector of the appliance.

Turn the knob to select Software update.

Push the Validation key

Caution: Do not turn the appliance off during the updating process

The updating process lasts ca. 3 minutes 30 seconds.

At the end of the updating process, the appliance invites you to push the ON/OFF key.

The software is now uploaded into your appliance.

A few error messages may appear: Do not take them into account.
